Celebrating our Parks

As Governor of Western Australia and proud Chair of the WA Parks Foundation, I am passionate about events which raise awareness of the importance of our State's natural environment.

I am delighted that the theme for this year's FACET 2017 Conference is 'Celebrating our Parks'. Our parks and conservation estates should be celebrated for their unique attributes and for providing us with so many benefits. We all have a role as stewards for them to ensure that they are protected and enriched for future generations.

Enjoying our spectacular parks and conservation estates has benefits at all levels – it is good for our physical and mental health, and also assists eco-tourism, as well as regional economies. The promotion of these values in turn supports the development of initiatives which will protect and conserve them.

FACET's work in fostering a network that combines people, nature and culture in decisions made about tourism and industry is extremely important. We are becoming a more responsible community when it comes to our natural environment and heritage and that is important.

I have visited most areas of our wonderful State, from the rugged wilderness of the Kimberley and Pilbara areas and that glorious red soil, to the beauty of the Gascoyne and the south-west with its jewel seas and wonderful forests. I also love the unique plants and animals, including those found in the parks around Perth itself.

I encourage organisations and community members to make the most of this important conference, and to continue to talk about how we can promote, protect and enrich our parks and conservation estates.

Looking after our natural landscapes can start at any level, and makes a great difference when it is borne from community projects and people like you.

I wish you all a rewarding and informative conference.
